

Serenity 300 Analogue Alternating Pressure Overlay Mattress - Medium Risk

The Serenity 300 Airflow Overlay Mattress, designed for medium-risk residents (grades 1-2), features 17 antibacterial Nylon/TPU air cells for optimal pressure redistribution. It includes advanced functions like a Pillow Function, Analogue Pump, CPR Function, and a Transport Function ensuring comfort and safety. This mattress is required to be used with an Underlay Mattress to protect the cells from resting directly on the bed's platform.

STANDARD FEATURES

Design & Durability: Composed of high-grade Nylon/TPU, providing strength and longevity.

Safety Assured: Integrated features for safety, including Cable Tidy and CPR Function.

Ease of Use: User-friendly Analogue Pump and simple Transport Function for caregiver convenience.
