

Serenity 500 Analogue Alternating Pressure Mattress - High Risk

The Serenity 500 mattress is expertly crafted for high-risk residents (grades 2-3), offering advanced pressure care with a 20-cell design that ensures optimal pressure redistribution. This design promotes exceptional comfort and is effective in preventing and managing pressure injuries. Incorporating features such as a Pillow Function, Analogue Pump, CPR Function and a Transport Function, the mattress is a comprehensive solution for enhanced resident care and comfort in care environments.

STANDARD FEATURES

Design & Durability: Constructed with durable Nylon/TPU, providing resilience and extended lifespan.

Safety Assured: Features like the Cable Tidy and CPR Function enhance resident safety and facilitate quick response in emergencies.

Ease of Use: The Analogue Pump is intuitively designed for ease of operation, complemented by the straightforward Transport Function for smooth resident transfers.
